

## Bug Report: Unregistered User Able to Log In

**Module:** Login Authentication

**Reported By:** Amrapali Devkant

**Environment:**

- Web Application
- Browser: Chrome v118
- OS: Windows 11

**Severity:** Critical

**Priority:** Highest

**Test Type:** Functional

---

### Description

An unregistered user is able to log in and access the dashboard, bypassing authentication checks. This behaviour violates expectations and poses a significant security risk.

---

### Steps to Reproduce

1. Navigate to the application login page.
  2. Enter an **unregistered email ID:** <unregistered@emailid.abcde>
  3. Enter a **valid password format:** <Password@1234>
  4. Click the **Login** button.
- 

### Expected Result

An error message should appear as “**Unregistered user email id.**” And the User should not be logged in.

---

### Actual Result

User is successfully logged in and redirected to the **Dashboard** page.

---

### Impact

- Unauthorised access to protected areas
  - Violation of authentication logic
  - Potential data breach or misuse of features
-
